To Whom It May Concern,

I am pleased to provide this referral for Rose Office Systems, which recently completed a multi-building project for our organization. From start to finish, the project was handled with professionalism, expertise, and a strong commitment to quality.

Coy Briscoe, who led the project on behalf of Rose Office Systems, was a particularly valuable asset. Coy was consistently responsive, communicative, and proactive in addressing any questions or concerns that arose throughout the process. His leadership played a key role in the overall success of the project.

The finished buildings are of high quality, and we are satisfied with the end result. While our total cost did exceed the original contract, this was due to change orders made pursuant to our requested upgrades in finish-out. They were not excessive and were managed in a transparent and reasonable manner.

One important aspect of this type of project is the coordination with the general contractor, and Rose Office Systems performed well in this area. They worked cooperatively to achieve alignment on schedules, site conditions, and deliverables, which helped keep the project moving forward efficiently.

Based on our experience, I would not hesitate to recommend Rose Office Systems for future modular building projects, especially where professionalism, responsiveness, and coordination with broader construction teams are essential.

Sincerely,

A handwritten signature in black ink that reads "Scott Vick".
