

BERMING FOR GROUND LEVEL FRONT ENTRANCES ON MODULAR BUILDINGS

Building designs by Rose Office Systems www.roseoffices.com

(877) 767-3284

Ground level entrances are so important for your commercial modular building. ADA code requirements specify all commercial buildings have a handicap accessible ramp. If your lot is relatively level, you can achieve a ground level entrance by berming the earth in front of your building and installing a gently sloping ADA accessible ramp that offers easy access right to your front door.
