

CUSTOM FEATURED BUILDING: Evergreen Medical Center Cat Scan Facility

Rose provided this single unit 16x50 modular building as a cat scan facility for Evergreen Medical Center in Evergreen, Alabama. The hospital contacted Rose when the need arose for additional space for a cat scan suite to be added. The cat scan machine sits on a concrete slab that was poured on site through an opening left out in the floor. This provided a solid, stable foundation for the delicate machine to maintain calibration. The interior features easy-to-maintain vinyl flooring, vinyl covered sheetrock walls and an attractive acoustical ceiling.
