To Whom It May Concern:

As Director of New Business Development at Southside Market and Barbeque, it was my responsibility to search, purchase and oversee the installation of four 14' X 60' modular units. After receiving proposals from four different modular building companies, we chose Coy Briscoe and Rose Office Systems, Inc. While we were looking for competitive pricing along with very good quality, we chose Rose Office Systems, Inc. due to Coy's personal involvement in our project. He not only took me to completed Rose buildings in the Austin area and arranged tours of those sites, but he also arranged for me to tour their Plant with him taking me through the step-by-step construction process, prior to contract signing.

But his involvement did not end with a signed contract and deposit paid. He arranged for him and I to meet at the Plant two additional times during the construction process. The day our units arrived and were starting to be assembled, Coy was there. When the installation was complete Coy was there, to make certain we were happy with the quality and installation of their product.

We now consider Coy part of the "Southside Team" and recommend him and Rose Buildings very highly.

Please feel free to reach out to me should you have any questions.

Sincerely,

Tom Abney
