To Whom It May Concern:

We recently worked with Gary Cain and Rose Office Systems to set up a temporary building to be used as our offices while our permanent offices are under construction. He helped us decide that it would be better to relocate offices to the temporary building rather than a children's classroom.

Rose Office Systems helped us develop a site plan and a floor plan that we were able to give to the Shelby County Planning Department in order to obtain a permit.

We have a very challenging terrain and Gary helped us locate the best building for the spot that we had available. Gary personally helped when the trailer had difficulty being delivered due to our location.

We have been extremely pleased with the customer service that has been provided. We had a few minor issues that came up as a result of the temporary building being moved over a great distance. His staff adjusted doors, found extra keys and helped the electricians set up our service. Gary and his staff were very quick to respond to our needs.

We would recommend Rose Systems to any company that needed modular space. We have been extremely happy with Gary Cain and Rose Systems.

You may contact our office at 980-1690.
